DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 23 - 51, drawn to an animal valve, classified in class 119, subclass 456.
 - II. Claims 52 - 57, drawn to a method of assembling a valve, classified in class 29, subclass 592.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as adding intermediate steps or changing the order of steps.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Steve Pokitilow on September 20, 2005 a provisional election was made without traverse to prosecute the invention I, claims 23 - 51. Affirmation of this election must be made by applicant in replying to this Office action. Claims 52 - 57 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. Applicant reserves the right to pursue claims 52 - 57 in a divisional.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jung Li on behalf of Steve Pokitilow on September 15, 2005.

The application has been amended as follows:

[paragraph 0093, line 4] "actuation force of 3 grams or less was optimal" change to

- -actuation force of 5 grams was preferred and 3 grams or less was optimal- -

2. This application is in condition for allowance except for the presence of claims 52 – 57, which ^{are drawn} ~~draw~~ to a method and are non-elected without traverse. Accordingly, claims 52 – 57 have been cancelled.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

A valve assembling having a spring element comprising of "dead coils" is new and does not resemble something formerly known or used in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
